GM Recall #: N140294

NHTSA Recall #: 14V346

Date Issued: Jun 26, 2014

Recall Title:

IGNITION KEY

Recall Description:

General Motors has decided that a defect which relates to motor vehicle safety exists in all 2010-2014 model year Chevrolet Camaro vehicles. There is a risk, under certain conditions, that some drivers may bump the ignition key with their knee and unintentionally move the key away from the run position. If this occurs, engine power, and power braking will be affected and power steering may be affected, increasing the risk of a crash.

Safety Risk Description:

The timing of the key movement out of the run position, relative to the activation of the sensing algorithm of the crash event, may result in the airbags not deploying, increasing the potential for occupant injury in certain kinds of crashes. Until the recall has been performed, it is very important that drivers adjust their seat and steering column to allow clearance between their knee and the ignition key.

Repair Description:

Dealers are to provide two replacement key rings. Vehicles with slotted keys will also receive key inserts. This will be provided free of charge. Please contact your dealer now to order parts. Until the recall has been performed, it is very important that you adjust your seat and steering column to allow clearance between your knee and the ignition key.

Recall Status: INCOMPLETE
